1. Visionary artists are known to make a lot of art...sometimes they will even fill an entire environment with art! How many paintings did artist Reverend Albert Wagner create over the course of his lifetime?

____________________________________________________

2. Visionary artists often have interesting backgrounds and stories to share. Take a closer look at the biographies of the artists featured in the current exhibit. Name the artist who fits the description below.

   a. Nicknamed “The House of Balls Guy”

   ______________________________________________

   b. Lives in an unheated attic in Connecticut

   ______________________________________________

   c. Remembers every dream he has ever had

   ______________________________________________

   d. Worked as a professional boxer

   ______________________________________________
3. Find the robots made by Allen Christian and Steve Heller. Be sure to check out the interesting materials they used in their creations. Draw your own robot in the box to the right!

4. Some people believe that technology has lead to some “disastrous inventions.” List two that are mentioned in the exhibit.

1. __________________________________________________________

2. __________________________________________________________

List one invention that you feel has been disastrous or harmful that is not mentioned in the exhibit.

1. __________________________________________________________

5. Artist RIGO23 lives and works in San Francisco and is dedicated to ecological and political activism. What kind of paper does he use to make his artwork?

____________________________________________________________

6. Artist Kenny Irwin Jr. has created a huge RoboLights installation at his home in Palm Springs, California. Find Kenny Irwin’s gallery installation & describe it in 5 words or less.

_______________________________________________________________________________________________________

7. Visionary artists often use their artwork to communicate a personal message or vision. Christopher Moses uses his art to express various themes and ideas that are important to him. What theme does his most recent work focus on?

_______________________________________________________________________________________________________

What is your reaction to this theme?

_______________________________________________________________________________________________________

_______________________________________________________________________________________________________

_______________________________________________________________________________________________________
8. Neil Harbisson was born completely colorblind, seeing only black, grey and white. He now wears a device that allows him to hear color through bone conduction, and therefore considers himself a cyborg. What is a cyborg?

If you were to develop your own “superhuman invention,” what would it be? Describe it, or draw it below.

9. Temple Grandin is an author, activist and professor who has become world renowned for her innovations and inventions. What invention is Temple Grandin best known for?

10. Find the artwork of Fred Carter. In the box to the right, write the title of your favorite Fred Carter piece, and draw a picture of it. What makes this piece stand out to you?

11. Many visionary artists use found objects and unusual materials to create their artwork. List 3 interesting materials used in the current show.

   1. __________________________________________

   2. __________________________________________

   3. __________________________________________
